

DOOR-LITES™

Visualization Software

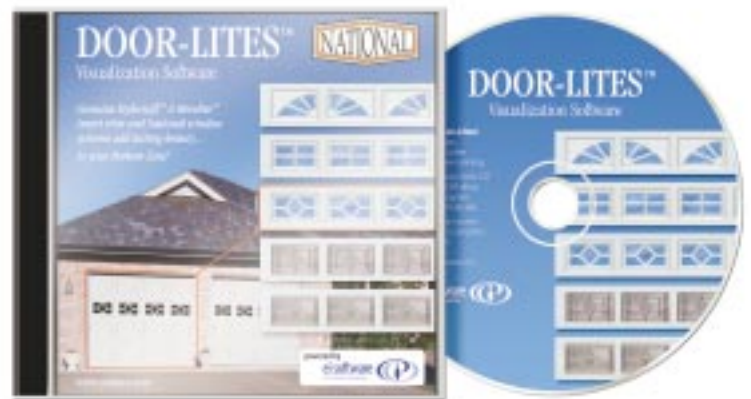

*Genuine Stylecraft™ & Bevelite™ insert trim
and National window systems add lasting beauty...
to your Bottom Line!*

Door Lites™ by National Door Industries is a professional software package that lets you image National's Stylecraft™ insert trim and Bevelite® products onto digital pictures of your client's home. This easy-to-use software will make your business money by helping your clients through the decision making process. You will be able to provide a service that will increase your value to your client while separating you from your competitors.

Features include:

- Easy to use interface
- Common door configurations
- Before and After presentation templates for printing
- Live 800 number technical support
- Doors are photo realistic and placed with the correct perspective
- Images can be from a digital camera, CD-Rom, or a desktop scanner.

System Requirements

Door-Lites™ requires the following minimum system configuration:

- A 200 MHz Intel Pentium-class or faster processor
- Windows 98, 2000, ME, XP
- At least 32 megabytes (MB) of random access memory (RAM)
- At least 50 MB of available hard disk space; additional disk space is required if you work with many large image files
- A 16 bit (high color) video display card
- Monitor resolution of 600 x 800 pixels or greater
- A CD-ROM drive

For achieving the best performance, we recommend the following hardware:

- 64 MB or more of RAM
- A 24 bit (true color) video display card
- Monitor resolution of 1024 x 768 pixels or greater
- A Windows-compatible color printer

If you need further information on how to purchase Door-Lites™, contact National's information desk at info@natdoor.com or call 1-800-NAT-DOOR. For specific architectural configuration options and a complete online catalog visit www.natdoor.com.
